

*At seed TRINITY
we believe
every
successful
program
is built upon
a strong
foundation.*

Your foundation and ours are of utmost importance. We cultivate our own seed, focusing on the multiplication of breeder foundation and registered seed of various species. Our goal is to uphold industry integrity while providing the finest mechanical and genetically pure seed.

A PASSION FOR TURFGRASS SEED®

MEET THE NEW PLAYER

*TOUGH TURF,
TOUGHER GAMES*

- *Tougher: Built to withstand the most demanding athletic requirements*
- *Resilient: Rapid recovery to maintain a consistent playing surface throughout the season.*
- *Uncompromising: Turf density, thickness, and disease resistance ensure optimal field performance.*
- *Versatile: Adaptable to various climates, shade conditions and drought challenges.*

AUTHORITY

SUPER TOUGH TURF®

Seed **TRINITY** is the result of the collaboration between growers and processors in the Columbia River Basin who share a passion for producing world-class turfgrass seed. With state-of-the-art facilities for growing, processing, and blending/mixing, **TRINITY** is committed to providing superior quality products to customers worldwide. We specialize in cool-season turfgrass and work with top breeders in North America to ensure their products are among the best in the market. Their attention to detail and commitment to excellence make seed **TRINITY** the perfect choice for high-quality turfgrass seed.

As a leading grass seed company, seed **TRINITY** firmly believes that every successful sports program starts with a strong foundation, and that foundation starts with top-quality turf. Our product line, **Authority STT®**, is designed to deliver superior turf performance, resilience, and aesthetics, catering to the specific needs of athletic fields and uncompromising open spaces. At seed **TRINITY**, we fully recognize the pivotal role that a high-quality playing surface contributes to the success of sports programs, and our dedication to providing top-notch grass seed underscores our commitment to helping sports programs thrive.

Natural turf offers a consistent playing surface that surpasses artificial turf in numerous aspects. Natural grass fields provide a more uniform and predictable surface, enhancing ball control and player stability. The natural resilience and robustness of grass to recover from intense use ensure a consistently superior playing experience over time. Furthermore, natural turf effectively absorbs impact, thereby reducing the risk of injuries compared to the unforgiving nature of artificial turf. This unwavering consistency and player-friendly playing surface make natural turf the superior choice for sports fields, prioritizing both performance and safety.

Let us find the right blend or mixture for you.

•4 WAY KBG SOD BLEND

Northern States Blend

- 30% Lightning
- 30% Resolution
- 30% Arc II
- 10% Blue Coat

Central States Blend

- 25% Lightning
- 25% Resolution
- 25% Blue Gem
- 25% Blue Devil

•3 WAY TTTF 80% AND 20% KBG SOD MIXTURE

Northern States Blend

- 25% Thor
- 30% Talladega II
- 25% Temple
- 10% Lightning
- 10% Resolution

Central States Blend

- 30% Talladega II
- 25% Temple
- 25% Thor
- 10% Lightning
- 10% Blue Gem

•3 WAY TTTF SOD BLEND

TURF TYPE TALL FESCUE

• **Temple** is a variety with a dwarf growth habit, demonstrating strong performance in wear trials. It exhibits improved resistance to brown patch disease and maintains great density throughout the growing season with a medium to dark genetic color.

• **Thor** is a top-rated tall fescue that offers excellent density, early spring greenup, improved overall disease resistance, superb drought tolerance, and a dark green color. **Thor** exhibits very high resistance to pythium blight and brown patch.

TALLADEGA II Talladega II has excellent density throughout the growing season in all regions of the US due to its tillering ability, which also helps to repair damaged areas of turf. This variety has shown good resistance to brown patch in hot, humid climates. Other benefits of **Talladega II** include excellent performance in drought conditions, fine leaf texture, and quick establishment.

• **Thunderstruck** is a deeply pigmented tall fescue variety that excels in NTEP drought trials and boasts superior density. Additionally, it has been ranked #1 in Net Blotch resistance, which causes small brown spots on grass leaves.

Ethos

Ethos is a new release with excellent drought tolerance and superior density during the growing season. It is also an outstanding seed yielder.

KENTUCKY BLUEGRASS

Lightning is a new release from Trinity with fast germination and improved turf performance. **Lightning** is in the current NTEP and initial data is superior. **Lightning** will be setting a new bar in turf quality and value.

Arc II is a moderately dark green turf with a medium blade width. It has excellent seedling vigor, which helps with seedling establishment. The seed count is 900,000 per pound. **Arc II** is an advancement in the Trinity lineup, providing a balance between seed yield and turf quality.

Resolution is a new variety with an on lower dormancy and quicker establishment resulting in better turf performance. Fine leaved, medium green color, early spring greenup and superior staying power in the summer months.

Blue Coat is a compact type that offers an extremely dark green color, providing effective traffic management. It has resistance to summer patch, snow mold and rust.

Blue Devil is an extremely dark midnight type, top-rated at Rutgers. **Blue Devil** is part of the new KBG NTEP.

Blue Gem is a synergy of poa pratensis and poa arachnifera. **Blue Gem** has superior disease resistance, good traffic tolerance and a very dark green color. **Blue Gem** is an elite Kentucky bluegrass stepping into a performance category that is difficult to attain.

Revolution Kentucky bluegrass is a quick-establishing variety known for its summer performance package and disease resistance package. It offers a dark green color and medium texture, making it an aesthetically appealing and durable choice for landscaping and turf applications. Moreover, it exhibits Midnight characteristics without the genetics of Midnight, making it a premium turf option. Coming 2025.
