

KEVIN

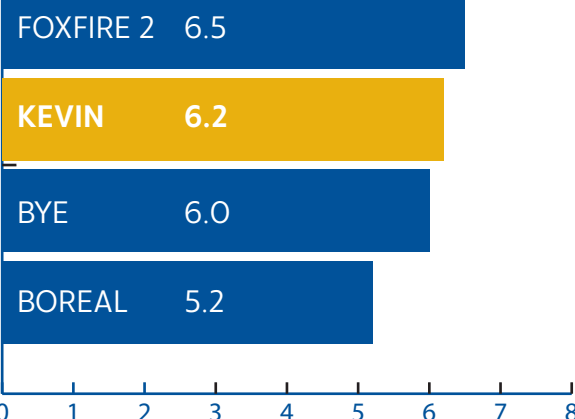

STRONG CREEPING RED FESCUE

Drought Tolerance (Wilting) Ratings

2020 National Fine Fescue Test, 2022 data
9 = No Wilting
Top 5.8; Bottom 4.0; LSD 1.7

Genetic Color Ratings

2020 National Fine Fescue Test, 2022 data
9 = Dark Green
Top 6.8; Bottom 5.2; LSD 0.4

full reports and more data available at www.turf.rutgers.edu

Trinity recently introduced **Kevin** strong creeping red fescue, a new variety that provides excellent turf performance and reliable seed production. This type of grass has exceptional shade tolerance, thrives in poorly drained soils, and requires minimal maintenance. **Kevin** maintains great density even with reduced fertility during the growing season, and it is wear-resistant.

Kevin blends well with other fine fescues, Kentucky bluegrass, and perennial ryegrass. For those seeking cutting-edge technology in strong creeping red fescue, **Kevin** is an excellent choice.

FACTS:

- Shade Tolerant
- Dark Green Color
- Performs at Fairway Height
- Improved Disease resistance

APPLICATIONS:

- Residential Lawns
- Commercial Properties
- Golf Course
- Parks
- Low Maintenance Areas

SEEDING RATES:

- New Establishment:
4-6 LBS/1000 sq. ft.
 - Overseeding:
2-3 LBS/1000 sq. ft.
- Estimated Seeds per pound: 365,000
